Professional Summary

Driven AI and Web Developer with a flair for blending intelligent systems with intuitive design. Experienced in Python and OpenCV for real-time vision projects, and skilled in crafting responsive web experiences using HTML, CSS, and JavaScript. Known for self-learning, creative thinking, and building solutions that bridge code and usability.

Technical Skills

Languages and Frameworks: Python, HTML, CSS, JavaScript, SQL

Libraries and Tools: OpenCV, TensorFlow, Keras, Git, GitHub

Design Tools: Canva (Posters, Logos, Branding)

Concepts: Computer Vision, AI and ML Models, GUI Design, Responsive Web Design, Emotion Detection

Projects

Face Recognition and Emotion Detection System

Tools: Python, OpenCV, Deep Learning, IP Webcam

Developed a real-time system to detect and recognize faces and identify emotions like happy, sad, angry, or neutral.

HSV Color Object Tracker

Implemented object tracking with directional feedback using HSV color space and OpenCV.

Motion Detection System

Built a security-focused frame differencing system to detect live motion through webcams.

AI Chatbot Assistant

Created an interactive chatbot using Python and basic NLP logic.

Personal Portfolio Website

Tools: HTML, CSS, JavaScript

Designed and deployed a personal portfolio featuring all AI and ML projects with GitHub links and resume integration.

Canva Digital Branding Projects

Designed logos, social media banners, and marketing posters using Canva's design principles.

Professional Experience

AI Developer Intern – NoviTech R and D Pvt Ltd

May 2025 to June 2025

Built real-time AI applications: face recognition, emotion detection, motion tracking

Worked on image preprocessing and GUI development

Led hands-on Python and OpenCV tasks for real-world solutions

Personal Portfolio Web Developer – Independent

May 2025 to June 2025

Created responsive personal website with animations and structured UI

Showcased technical projects and maintained content layout

GitHub Portfolio Manager – Self-Learning

May 2025 to June 2025

Published and documented AI projects with clear READMEs

Maintained version control, organized repositories, and demonstrated learning growth

Web Development Learner – Remote, Self-Taught

May 2025 to Present

Built static sites with focus on structure and responsiveness

Practiced form design, layout styling, and UI aesthetics

Canva Designer and Branding Specialist – Independent

February 2024 to Present

Delivered multiple design assets: posters, logos, banners

Enhanced brand identity using layout, typography, and color theory

Education

Bachelor of Computer Applications

Ponnaiyah Ramajayam Institute of Science and Technology, Thanjavur

June 2021 to June 2024

Explored video editing, photo editing, and digital design during college years

Independently pursued projects and real-world technical learning

Achievements

Built over eight AI and computer vision projects as a fresher

Designed professional graphics and branding content for self and others

Actively self-taught advanced tech skills outside curriculum

Created and maintained personal GitHub and online portfolio
